Product Information

D893 Low VOC Performance Clear (California)

Product Description
D893 Low VOC Performance Clear is a premium quality high solids clearcoat specifically formulated for today's high production shop. The force dry time of D893 is up to 50% lower than traditional clears. D893 can be polished within minutes after cooling down.

D893 is designed for use over Global BC Colour (see Data Sheet EU-02).

Preparation of Substrate

In all cases, wash all surfaces to be painted with soap and water, then apply the appropriate Global cleaner. See GLG-142 Global Cleaners bulletin for selection and usage instructions. Ensure that the substrate is thoroughly cleaned and dried both before and after application work.

Wet sand with European P800-1200 / U.S. 500-600 grade paper or dry sanding with European P600-800 / U.S. 400-500 grade paper.

Wash off residue and dry thoroughly before recleaning with appropriate Global substrate cleaner. The use of a tack rag is recommended.

Apply Global BC Colour over original stoved finishes or over recommended Global Primers. See Data Sheet EU-02 for Global BC system application details.
**APPLICATION GUIDE**

**Mixing Ratio:**
- D893 3 vols
- Hardener 1 vol
- D-Thinner 1 vol

**Hardener Selection**
- D884 Air Dry / General Purpose
- D887 Stoving / Mar Resistance

**Thinner Selection**
- D8764 Fast Compliant Thinner
- D8767 Compliant Thinner
- D8774 Medium Compliant Thinner

Note: Smaller areas may require faster thinner.

**Potlife:**
- @ 20°C / 68°F 1 hour

**Additives:**
- Use **D759 Matting Base** to flatten D894 Clear
- Use **D814 Plasticiser** to flexibilize D894 Clear

See EU-33 for application instructions.
See EU-47 for application instructions.

**Spraygun set-up:**
- **Fluid Tip** 1.3 – 1.5 mm or equivalent
- **Spray Viscosity** 17 – 18 secs #2 ZAHN (Signature type @ 20°C / 68°F)

**Spray pressure:**
- HVLP at air cap 0.7 bar / 10 PSI
- Conventional at spray gun 3 - 4 bar / 45 - 55 PSI

**Number of coats:**
- Apply 2 normal coats
  - **Film build per wet coat** 2.10 – 2.50 mils
  - **Dried film build per coat** 1.00 – 1.25 mils

**Flash off at 20°C / 68°F:**
- **Between coats** 5 – 10 minutes
- **Before stoving** 0 – 15 minutes

**Drying times:**
- **Dust-free** 20°C / 68°F 20 – 25 minutes
- **Dry to handle** 20°C / 68°F 4 hours minimum
  - 60°C / 140°F 15 – 20 minutes
- **Tape Time**
  - 20°C / 68°F 6 – 8 hours
  - 60°C / 140°F 15 – 20 minutes
- **Through Dry**
  - 20°C / 68°F 8 hours
  - 60°C / 140°F 15 – 20 minutes
- **IR (infrared)**
  - Medium Wave 15 minutes
  - Short Wave 8 minutes

Note: All force dry times are quoted for metal temperature. Additional time must be allowed during force dry to allow metal to reach recommended temperature.

<tr>
<td>Grade dry</td>
<td>European P600 – 800 / U.S. 400 – 500</td>
</tr>
<tr>
<td>Overcoat with</td>
<td>Any Global topcoat system</td>
</tr>
</tbody>
</table>

Performance Guidelines:

Allow the Global BC Colour to flash off for 15 minutes (but no longer than 24 hours) before applying D893 Clear. The timing will depend on thickness and temperature.

Recoating times will be extended at lower temperatures. Global D893 may be sanded with 1200 grit paper or finer and polished when hard, to rectify minor imperfections.

Fading Out - D893 Clear
After spot repairing, clean the gun and then spray Global Blending Thinner D853 around the repaired area to lose the edge and blend the repair into the surrounding panel. Spray starting from the outside of the repair, moving to the center.

</tbody>
</table>

Theoretical coverage | 15.8 m² per litre / 642.2 sq. ft. per US gal. |

Note: Theoretical coverage in m²/litre and sq.ft./US gal. Ready-to-spray (RTS), giving 25 µm (1 mils) dry film thickness.

Percent solids by volume RTS | 40.0 |

VOC

(D893) | 492 gms per litre / 4.10 lbs. per US gal. |
(D893:D884:D872, 3:1:1) | 410 gms per litre / 3.42 lbs. per US gal. |

Health and Safety:

See Material Safety Data Sheet and Labels for additional safety information and handling instructions.

- The contents of this package may have to be blended with other components before the product can be used. Before opening the packages, be sure you understand the warning messages on the labels and MSDS's of all the components, since the mixture will have the hazards of all its parts.

- Improper handling and use, for example, poor spray technique, inadequate engineering controls and/or lack of proper Personal Protective Equipment (PPE), may result in hazardous conditions or injury.

- Follow spray equipment manufacturer's instructions to prevent personal injury or fire.

- Provide adequate ventilation for health and fire hazard control.

- Follow company policy, product MSDS and respirator manufacturer's recommendations for selection and proper use of respiratory protection. Be sure employees are adequately trained on the safe use of respirators per company and regulatory requirements.

- Wear appropriate PPE such as eye and skin protection. In the event of injury, see first aid procedures on MSDS.

- Always observe all applicable precautions and follow good safety and hygiene practices.
