Product Information

Fast Clear D8101

Product Description
Global Refinish System D8101 is a premium quality high solids clearcoat specifically formulated for today’s high production shop. D8101 is designed for spot and panel repairs and is out of dust in a matter of minutes. It can be polished if desired, the same day. D8101 is designed to be used over Global BC Colour (see Data Sheet EU-02).

Preparation of Substrate

- In all cases, wash all surfaces to be painted with soap and water, then apply the appropriate Global cleaner. See EU-134 Global Cleaners bulletin for selection and usage instructions.
- Ensure that the substrate is thoroughly cleaned and dried both before and after application work.
- Wet sand with European P800 –1200 / U.S. 500 – 600 grade paper or dry sanding with European P600 – 800 / U.S. 400 – 500 grade paper.
- Wash off residue and dry thoroughly before recleaning with appropriate Global substrate cleaner.
- The use of a tack rag is recommended. Apply Global BC Colour over original stoved finishes or over recommended Global Primers.
- See Data Sheet EU-02 for Global BC system application details.
### Mix Ratio:

<td>18° – 25°C / 65° – 77°F</td>
</tr>
<tr>
<td>D872</td>
<td>25° – 35°C / 77° – 95°F</td>
</tr>
<tr>
<td>D873</td>
<td>Over 35°C / 95°F</td>
</tr>
</tbody>
</table>

### Additives:

- Use **D759 Matting base** to flatten D8101 Clear
- Use **D814 Plasticiser** to flexibilize D8101 Clear

### Spraygun set-up:

- **Fluid Tip**: 1.3 – 1.5 mm or equivalent
- **Spray Viscosity**: 15 – 20 secs #2 ZAHN (Signature type) @ 20°C / 68°F

### Spray pressure:

- **HVLP at air cap**: 0.7 bar / 8 – 10 PSI
- **Conventional at spray gun**: 3 – 4 bar / 45 – 55 PSI

### Number of coats:

- **Apply**: 2 coats
- **Film build per wet coat**: 2.4 – 2.8 mils
- **Dried film build per coat**: 1.2 – 1.4 mils

### Flash off at 20°C / 68°F:

- **Between coats**: 2 – 5 minutes
- **Before stoving**: 0 – 10 minutes

### Drying times:

- **Dust-free**: 20°C / 68°F: 4 – 8 minutes
- **Dry to handle**: 20°C / 68°F: 4 hours minimum, 60°C / 140°F: 10 – 15 minutes
- **Tape Time**: 20°C / 68°F: 4 – 6 hours, 60°C / 140°F: 10 – 15 minutes
- **Through Dry**: 20°C / 68°F: 8 hours, 60°C / 140°F: 15 minutes
- **IR (Infrared)**:
  - Medium Wave: 15 minutes
  - Short Wave: 8 minutes

**Note:** All force dry times are quoted for metal temperature. Additional time must be allowed during force dry to allow metal to reach recommended temperature.
Overcoat/Recoat:

**Overcoat/Recoat Time**
After 2 hours at 20°C (68°F) or after force dry/cool down. D8101 must be sanded after 3 days before recoating to ensure optimum adhesion.

**Grade wet**
European P800 – 1200 / U.S. 500 – 600

**Grade dry**
European P600 – 800 / U.S. 400 – 500

**Overcoat with**
Any Global topcoat system

Performance Guidelines:
Allow the Global BC Colour to flash off for 15 minutes (but no longer than 24 hours) before applying D8101 Clear. The timing will depend on thickness and temperature. Recoating times will be extended at lower temperatures. Global D8101 may be sanded with 1200 grit paper or finer and polished when hard, to rectify minor imperfections.

**Fading Out - D8101 Clear**
After spot repairing, clean the gun and then spray **D8753 Blend Ease Universal Blending Solvent** around the repaired area to lose the edge and blend the repair into the surrounding panel. Spray starting from the outside of the repair, moving to the center.

Technical Data:

<table>
<thead>
<tr>

**Theoretical coverage**
15.2 m² per litre / 618.18 sq.ft. per US gal.

**Theoretical coverage in m²/litre and sq.ft./US gal. Ready-to-spray (RTS), giving 25µ (1 mil) dry film thickness.**

**Percent solids by volume RTS**
38.5

**VOC Regulatory (Less Water, Less Exempts)**
D8101 : D8201 : D872 (3:1:1) 498 gms per litre / 4.16 lbs. per US gal.

Product Compatibility:
D8101 may be applied over any Global basecoat.

Health and Safety:

- See Material Safety Data Sheet and Labels for additional safety information and handling instructions.
- The contents of this package may have to be blended with other components before the product can be used. Before opening the packages, be sure you understand the warning messages on the labels and MSDS’s of all the components, since the mixture will have the hazards of all its parts.
- Improper handling and use, for example, poor spray technique, inadequate engineering controls and/or lack of proper Personal Protective Equipment (PPE), may result in hazardous conditions or injury.
- Follow spray equipment manufacturer’s instructions to prevent personal injury or fire.
- Provide adequate ventilation for health and fire hazard control.
- Follow company policy, product MSDS and respirator manufacturer’s recommendations for selection and proper use of respiratory protection. Be sure employees are adequately trained on the safe use of respirators per company and regulatory requirements.
- Wear appropriate PPE such as eye and skin protection. In the event of injury, see first aid procedures on MSDS.
- Always observe all applicable precautions and follow good safety and hygiene practices.
